

# PHASE 8 – PROJECT DEMONSTRATION

*Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer*

## **Demonstration Objective**

The demonstration presents the completed Standard Laptop procurement automation in ServiceNow and shows the request, approval, automatic task creation, and Hardware assignment.

## **Demonstration Steps**

1. Open ServiceNow and Service Catalog.
2. Select Hardware and Standard Laptop.
3. Click Order Now.
4. Show Order Status and open the Request Number.
5. Show the Approvers section and Requested Item.
6. Complete the documented approval step.
7. Scroll to Catalog Tasks.
8. Open the created Catalog Task.
9. Show task status, short description, and Hardware assignment.

## **Flow Designer Explanation**

During the demo, show the Standard Laptop Task flow and explain that it uses the Service Catalog context and Create Catalog Task action. Show the mapped Requested Item Record and the configured task fields.

## **Key Features**

- Service Catalog based Standard Laptop request.
- Approval-based process.
- Flow Designer automation.
- Automatic Catalog Task creation.

- Automatic Hardware group assignment.
- Task details available for verification.

### **Project Benefits**

The project reduces manual intervention, supports timely laptop configuration, reduces user waiting time, improves task allocation, and increases IT procurement efficiency.

### **Suggested Demo Narration**

This project streamlines Standard Laptop ordering using ServiceNow Flow Designer. After the request reaches the approved stage, the automation creates the configuration Catalog Task and assigns it to Hardware. The resulting task can be verified from the Requested Item record.

### **Demo Evidence**

The final demonstration can include the Service Catalog request, approval/request details, Flow Designer configuration, and the resulting Catalog Task.

### **Conclusion**

The demonstration shows the complete project workflow and the practical result of automating Standard Laptop procurement with Flow Designer.
